

Bachelor of Technology in CSE with Specialization Cloud Computing & AI

B. Tech -CSE (Cloud Computing & AI)

(Aligned with NEP 2020 & with the guidelines of UGC/ AICTE)

Academic Batch: 2026–2030

JK Institute of Technology (JKIT)

Programme Overview

About the Programme

The **Bachelor of Technology in Computer Science and Engineering with Specialization in Cloud Computing & Artificial Intelligence (B.Tech. CSE – Cloud Computing & AI)** is a four-year undergraduate engineering programme designed to prepare students for the rapidly evolving world of cloud technologies, intelligent computing, and digital transformation. Aligned with the **National Education Policy (NEP) 2020** and **AICTE guidelines**, the programme combines the core principles of Computer Science and Engineering with specialized knowledge in Cloud Computing, Artificial Intelligence, Machine Learning, Data Analytics, Distributed Systems, and Intelligent Automation.

The curriculum provides a strong foundation in programming, algorithms, databases, operating systems, software engineering, networking, and cybersecurity while offering advanced training in cloud infrastructure, cloud-native application development, DevOps, virtualization, AI-powered systems, machine learning, generative AI, and scalable computing platforms. Students gain hands-on experience through laboratories, cloud platforms, live projects, internships, hackathons, and industry collaborations.

The programme emphasizes innovation, computational thinking, cloud architecture design, intelligent application development, and responsible use of emerging technologies. Graduates are equipped to build scalable, secure, and intelligent digital solutions for modern enterprises and cloud-first organizations.

Programme Highlights

→ NEP 2020 Aligned

Flexible, multidisciplinary curriculum integrating Computer Science, Cloud Computing, and Artificial Intelligence.

→ Cloud Computing & AI Specialization

Comprehensive training in cloud platforms, distributed systems, AI, machine learning, and intelligent automation.

→ Industry-Oriented Curriculum

Designed to address the growing demand for cloud engineers, AI professionals, and digital transformation specialists.

→ Value Education and Holistic Development

Focus on ethics, leadership, communication, teamwork, and professional excellence.

→ Entrepreneurship and Startup Ecosystem

Support for building cloud-enabled and AI-driven products, services, and technology ventures.

Semester I — Building Foundations in Computing and Cloud Technologies

Total Credits: 28 | The first semester builds a strong foundation in programming, computer systems, mathematics, and cloud computing while developing essential analytical and problem-solving skills for future technology professionals..

Sl. No.	Course Code	Subject	Category	L	T	P	Credits
1	CSCC001	Programming Logic & Technique	BRC	2	0	1	3
Commencement of First Semester							
2	CSCC101	Programming with C	MAJ	2	0	1	3
3	CSCC102	Operating System	MAJ	3	0	1	4
4	ELIX101	Digital Logic Design	MAJ	2	0	1	3
5	RISE101	Computational Thinking and Problem-Solving Technique	MIN	3	0	1	4
6	MATH101	Mathematics for Computer Science	MD	3	0	0	3
7	PHYS101/ ELIX102	Modern Physics/ Basic Electronics	MD	2	0	1	3
8	ABLE101	Communicative English - I	AEC	1	0	1	2
9	CDLC101	Intro to Cloud Computing & Virtualization	SEC	1	0	2	3
10	JKVA101	Science of Mind Management	VAC	1	0	1	2
11	JKGP101	General Proficiency-1	GP	-	-	1	1

① BRC- Bridge Course | MAJ – Major | MIN – Minor | MD – Multi Disciplinary | AEC – Ability Enhancement Course | SEC – Skill Enhancement Course | VAL – Value Added Course | GP – General Proficiency

Semester II — Programming, AI, and Web Development Foundations

Total Credits: 28 | The second semester develops expertise in data structures, Python, Artificial Intelligence, and web technologies while building the analytical and technical skills required for cloud-enabled and intelligent software systems.

Sl. No.	Course Code	Subject	Category	L	T	P	Credits
1	CSCC103	Data Structures using C	MAJ	2	0	1	3
2	CACC101	Python Programming	MAJ	2	0	1	3
3	AIML101	Introduction to AI	MAJ	3	0	1	4
4	RISE102	Design Thinking	MIN	3	0	1	4
5	MATH103	Applied Mathematics	MD	3	0	0	3
6	PHYS101/ ELIX102	Modern Physics/ Basic Electronics	MD	2	0	1	3
7	ABLE102	Communicative English - II	AEC	1	0	1	2
8	CACC205	Web Technologies & Frontend Frameworks	SEC	1	0	2	3
9	JKVA102	Art & Science of Happiness	VAC	1	0	1	2
10	JKGP102	General Proficiency - II	GP	-	-	1	1

① MAJ – Major | MIN – Minor | MD – Multi Disciplinary | AEC – Ability Enhancement Course | SEC – Skill Enhancement Course | VAL – Value Added Course | GP – General Proficiency

Semester III — Cloud Infrastructure, Data Management, and Intelligent Computing

Total Credits: 24 | The third semester develops expertise in cloud computing, databases, networking, big data, and Linux system administration while building the analytical and technical skills required for modern cloud and AI-driven environments.

Sl. No.	Code	Subject	Category	L	T	P	Cr.
1	CSCC201	DBMS	MAJ	2	0	1	3
2	CACC201	Computer Hardware & Networking	MAJ	2	0	1	3
3	CDLC202	Applied Cloud Computing	MAJ (SPL)	3	0	1	4
4	AIML211	Data Centric	MIN	3	0	1	4
5	MATH 201	Probability & Statistics	MD	3	0	0	3
6	AIML214	Big Data	AEC	1	0	1	2
7	CACC206	Linux System Administration & Security	SEC	1	0	1	2
8	JKVA201	Golden Rules for Living Your Best Life	VAC	2	0	0	2
9	JKGP201	General Proficiency 3	GP	-	-	1	1

Semester IV — Cloud-Native Development and Intelligent Data Processing

Total Credits: 24 | The fourth semester develops expertise in machine learning, software engineering, networking, and user experience design while strengthening the technical and mathematical foundations required for building intelligent and scalable technology solutions.

Sl. No.	Course Code	Subject	Category	L	T	P	Credits
1	CSCC 202	Programming in Java	MAJ	2	0	1	3
2	CACC 203	Computer Organisation and Architecture	MAJ	3	0	1	4
3	CDLC207	Big Data on Cloud	MAJ	3	0	1	4
4	AIML212	Machine Learning	MIN	3	0	1	4
5	CDLC203	Backend Dev & Microservices (Go/Node.js)	SEC	1	0	2	3
6	JKVA202	The Power of Thoughts	VAC	1	0	1	2
7	JKGP202	General Proficiency 4	GP	-	-	-	1

- ✔ Semester IV marks the completion of the first two years — students are now eligible for a **Diploma exit** under the NEP 2020 multiple entry/exit framework.

Semester V — Cloud Application Development, DevOps, and AI Integration

Total Credits: 21 | The fifth semester develops expertise in cloud application development, DevOps, cloud infrastructure, and Generative AI while equipping students with the skills required to build, deploy, and manage scalable cloud-native and AI-powered solutions.

Sl. No.	Code	Subject	Category	L	T	P	Cr.
1	CSCC 301	Design Algorithm & Analysis (DAA)	MAJ	3	0	1	4
2	CACC 301	Internet Web Technology	MAJ	2	0	1	3
3	CDLC304	Cloud App Development & Dev Ops	MAJ	3	0	1	4
4	AIML305	Introduction to Gen AI and Prompt Engineering	MIN	3	0	1	4
5	CDLC303	Cloud Infrastructure & Networking (VPC/IAM)	SEC	1	0	2	3
6	RISE303	Employability Planning I	AEC	1	0	1	2
7	JKGP301	General Proficiency 5	GP	-	-	-	1

Semester VI — Securing, Scaling, and Deploying Intelligent Cloud Systems

Total Credits: 21 | The sixth semester develops expertise in cloud security, containerization, orchestration, and AI/ML deployment while preparing students to build secure, scalable, and intelligent cloud-based applications for modern enterprises.

Sl. No.	Course Code	Subject	Category	L	T	P	Credit
1	CSCC302	Software Engineering	MAJ	3	0	1	4
2	CYBR302	Data Security & Privacy (Cloud & AI)	MAJ	3	0	1	4
3	CDLC305	Containerization & Orchestration (Docker/K8s)	MAJ	2	0	1	3
4	AIML307	AI & ML on Cloud	MIN	3	0	1	4
5		Minor Project	SEC	1	0	2	3
6	RISE304	Employability Planning II	AEC	1	0	1	2
7	JKGP302	General Proficiency 6	GP	-	-	-	1

Semesters VII & VIII — Advanced Cloud Engineering and Professional Practice

For Honours Students:

CSCC401 – High Performance Computing (HPC) | Honours Degree | 4 Credits

AIML301 – Deep Learning | Honours Degree | 4 Credits

CDLC406 – Cloud Warehousing | Honours Degree | 4 Credits

For Non-Honours Students:

CDLC404 – Responsible AI & Cloud Governance | MAJ | 4 Credits

CDLC405 – Serverless Computing & Cloud APIs | MAJ | 4 Credits

CDLC407 – DevOps & Infrastructure as Code (Terraform) | MAJ | 4 Credits

CDLC401 – Site Reliability Engineering (SRE) & Monitoring | MIN | 4 Credits

AIML404 – Agentic AI | SEC | 3 Credits

Total Credits: 19

Semester VIII — Total Credits: 22

Project

Research Project / Live Industry Project / Capstone Project with Seminar Presentation
| Research Track / Industrial Track | **12 Credits**

Minor Elective

CDLC402 – Cloud Cost Optimization & FinOps | MIN | **4 Credits**

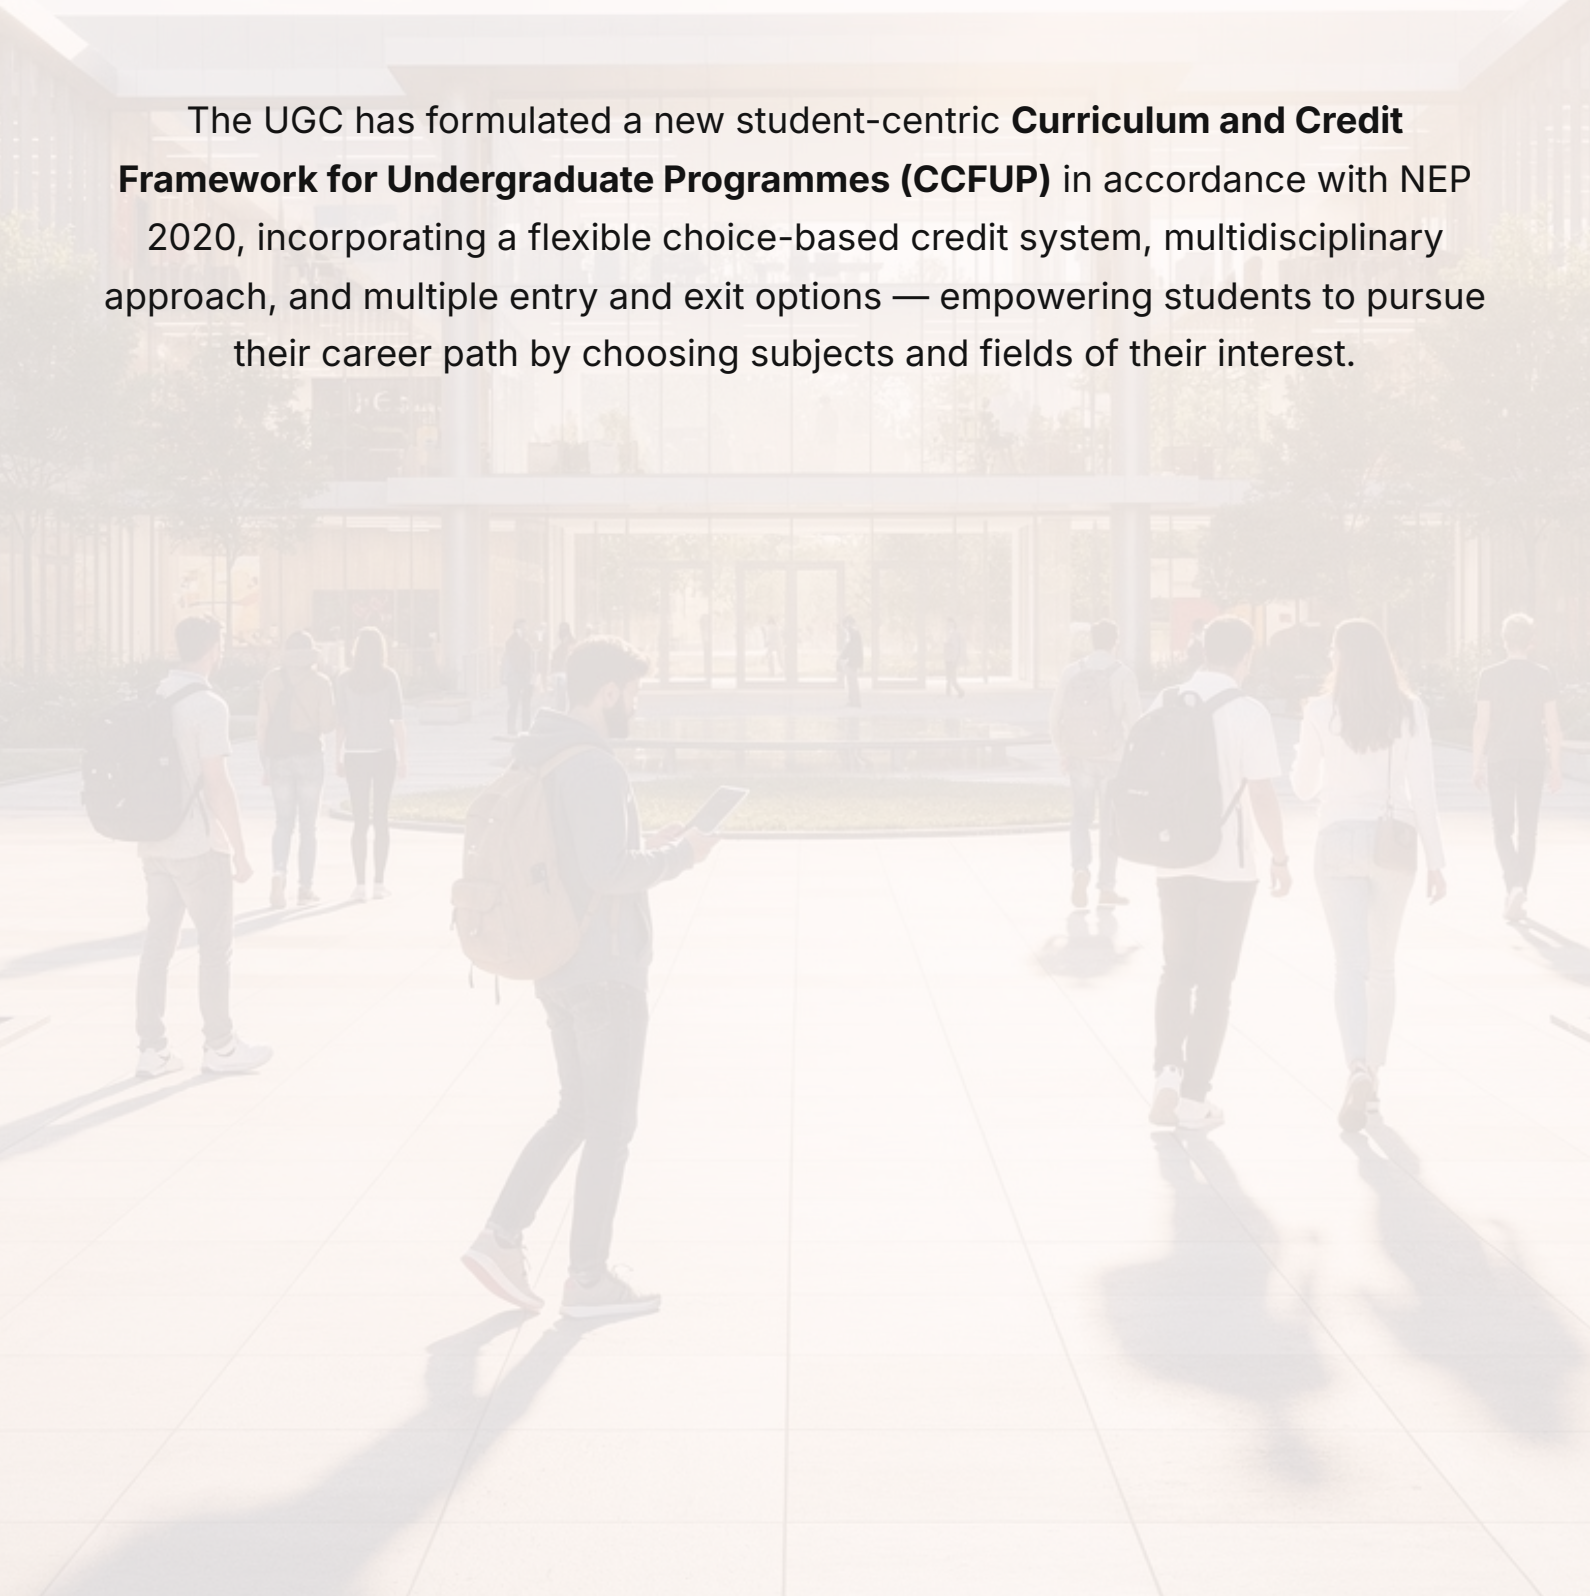

On-the-Job Training (OJT) / Internship | SEC | **6 Credits**

- ✓ The final semester is dedicated to **research, innovation, and professional practice**, enabling students to apply Artificial Intelligence and Machine Learning concepts to real-world challenges. Students undertake a **Research Project, Live Industry Project, or Capstone Project**, demonstrating their ability to design, develop, deploy, and evaluate intelligent solutions while showcasing their technical, analytical, and problem-solving capabilities through a seminar presentation. This semester prepares graduates for professional careers, higher studies, entrepreneurship, and research in emerging AI technologies.

Features of National Education Policy (NEP-2020)

For UG Programs

The UGC has formulated a new student-centric **Curriculum and Credit Framework for Undergraduate Programmes (CCFUP)** in accordance with NEP 2020, incorporating a flexible choice-based credit system, multidisciplinary approach, and multiple entry and exit options — empowering students to pursue their career path by choosing subjects and fields of their interest.

Core Features of the NEP Framework

The NEP 2020 framework introduces transformative changes to undergraduate education, designed to give students greater freedom, flexibility, and holistic development.

Flexible Curricular Structures

Creative combinations of disciplinary areas enabling multidisciplinary study alongside rigorous specialisation in chosen subjects.

Multiple Entry & Exit Options

3 or 4-year UG degree programmes with UG Certificate, UG Diploma, or Degree depending on credits secured.

4-Year Honours Degree

Eight-semester programme with an option for Honours with Research upon completion of a rigorous research project in the major area.

Holistic & Multidisciplinary Education

The 4-year programme is the preferred option, offering the full range of holistic education alongside chosen major and minor disciplines.

Global Citizenship Education

Education for sustainable development integrated into the curriculum to empower learners as active promoters of peaceful, inclusive, and sustainable societies.

Internships & Apprenticeships

Opportunities with industries, businesses, premier institutions, and research organisations to actively engage with the practical side of learning.

Cutting-Edge Curriculum

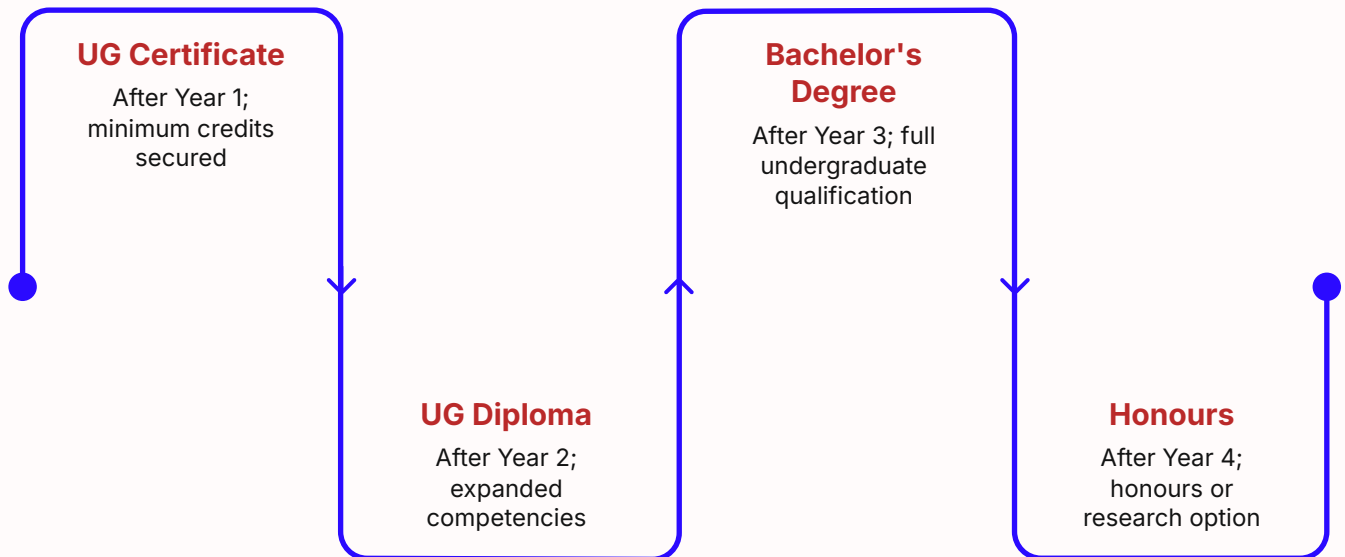

Preparation in AI, Agentic AI, Big Data, Machine Learning, FinTech, Cyber Security, Quantum Computing, Robotics, VLSI, Genomics, and more.

Alternative Learning Modes

Flexibility to switch between offline, ODL, online, and hybrid modes of learning as per student needs.

Multiple Entry & Exit Options

One of the most student-friendly features of NEP 2020 is the structured pathway that allows students to enter, exit, and re-enter the UG programme at defined milestones — ensuring no year of study is wasted.

Students who exit with a UG Certificate or UG Diploma are permitted to **re-enter within three years** and complete the degree programme. Students may also take a break during the period of study, but the total duration for completing the programme shall not exceed **7 years**.

- ① The Academic Bank of Credit (ABC) and guidelines for Multiple Entry and Exit are already in place to facilitate the implementation of CCFUP.

Minimum Credit Requirements

A student must fulfil the following minimum credit requirements for the award of a degree under each category. The framework ensures a balanced distribution across major, minor, multidisciplinary, and skill-based components.

Category	3-Year UG (120 Credits)	4-Year UG (160 Credits)	Remarks
Major with Specialisation	Min. 60 Credits (50%)	Min. 80 Credits (50%)	Core discipline focus
Minor Discipline	Min. 32 Credits	Min. 32 Credits	Broader understanding
Multidisciplinary Courses	Min. 9 Credits	Min. 9 Credits	Liberal arts & science
Ability Enhancement (AEC)	Min. 8 Credits	Min. 8 Credits	Language & communication
Skill Enhancement (SEC)	Min. 9 Credits	Min. 9 Credits	Practical & soft skills
Value-Added Courses (VAC)	Min. 6 Credits	Min. 6 Credits	Understanding India, community
Summer Internship	Min. 2–4 Credits	Min. 4 Credits	Work-based learning
Research Project / Dissertation	—	Min. 12 Credits	Honours with Research only
Total Minimum Credits	120 Credits	160 Credits	20 credits per semester

- ❑ 40% of the credits in any category may be earned through online courses approved by the Department and Institution as per existing UGC regulations.

Course Level Numbering System

The NEP framework introduces a standardised course numbering system to indicate the level and complexity of each course offered across all UG and PG programmes.

1	0–99: Pre-requisite / Bridge Courses Pass or fail courses with no credits. Replaces the existing informal bridge courses conducted in colleges and universities.
2	100–199: Foundation / Introductory Courses Entry-level courses designed to introduce students to the fundamentals of a discipline.
3	200–299: Intermediate-Level Courses Courses that build upon foundational knowledge and develop deeper understanding.
4	300–399: Higher-Level Courses Advanced undergraduate courses requiring prior foundational and intermediate knowledge.
5	400–499: Advanced Courses Specialised courses at the upper undergraduate level, often linked to research and industry applications.
6	500–699: Master's Level Courses 500–599 for first-year Master's; 600–699 for second-year of 2-year Master's or 1-year Master's degree programmes.
7	700+: Doctoral Level Courses Courses limited to doctoral students pursuing advanced research and specialisation.

Major, Minor & Multidisciplinary Disciplines

Major Discipline (Min. 80 Credits)

The primary discipline of focus. Students must secure ~50% of total credits through core courses in the major with specialisation. A student with 80 credits in Physics out of 160 total credits is awarded B.Sc. (Hons.) in Physics.

Eligibility for Honours with Research: CGPA of 7.5 (75%) after completion of 3rd year (6th semester).

Students can opt for a **Double Major** by securing a minimum of 40% credits (64 out of 160) from a second major discipline.

Minor Discipline (Min. 32 Credits)

Helps students gain broader understanding beyond the major. For example, a student in Computer Science & Engineering (AI&ML) may choose Cyber Security or Data Engineering as a minor.

Minor stream courses must be from the 300-level or above. 50% of minor credits must be in the relevant subject; the remaining 50% can be from any discipline of the student's choice.

Multidisciplinary Courses (Min. 9 Credits)

All UG students must complete 3 introductory-level courses from broad disciplines such as Natural Sciences, Mathematics & Statistics, or Humanities. Students cannot repeat courses already studied at the 12th class level.

- ① Students may change their major within the broad discipline at the end of the first year. HEIs may create **10% additional seats** over and above sanctioned strength to accommodate change-of-major requests, with preference given to students with the highest CGPA and no arrears.

Ability Enhancement, Skill Enhancement & Value-Added Courses

These course categories ensure that every UG student develops well-rounded competencies — from language and communication to practical skills and civic awareness.

Ability Enhancement Courses (AEC) — Min. 8 Credits

Focused on **Modern Indian Language (MIL) & English** with emphasis on language and communication skills. Develops critical reading, expository writing, academic writing, and the ability to participate in discussions and debates. Helps students appreciate the cultural and intellectual heritage of their chosen MIL.

Skill Enhancement Courses (SEC) — Min. 9 Credits

Aimed at imparting **practical skills, hands-on training, and soft skills** to enhance employability. Institutions may design courses as per students' needs and available resources. Vocational Education and Training forms an integral part, with a minimum of 12 credits allotted to the Minor stream for vocational courses.

Value-Added Courses (VAC) — Min. 6–8 Credits

Understanding India: Knowledge of contemporary India, its historical perspective, national development goals, constitutional values, fundamental rights and duties, India's freedom struggle, and Indian knowledge systems.
Community Engagement & Service: Exposes students to socio-economic issues and supplements theoretical learning with real-life experiences. **Field-Based Learning / Minor Project:** Provides exposure to development-related issues in rural and urban settings.

Internships, Projects & Research

Summer Internship / Apprenticeship / OJT (Min. 2–4 Credits)

All students undergo internships or apprenticeships in firms, industries, organisations, or research labs during the summer term. Opportunities span local industry, business organisations, health sectors, local governments (panchayats, municipalities), Parliament, media organisations, artists, and crafts persons. Students exiting after the first two semesters must complete a **4-credit work-based learning/internship** to receive a UG Certificate.

Minor Project (Min. 2 Credits)

A practical, hands-on project applying concepts from programming, data analytics, or AI. Students design and develop a small software application, AI model, or data-driven solution to solve a real-world problem. May be carried out individually or in a small team under faculty supervision. Requires a project report and presentation/demonstration at the end of the semester. Objective: enhance problem-solving ability, coding skills, and technical confidence before the major project.

Major / Captioned Project (Min. 12 Credits)

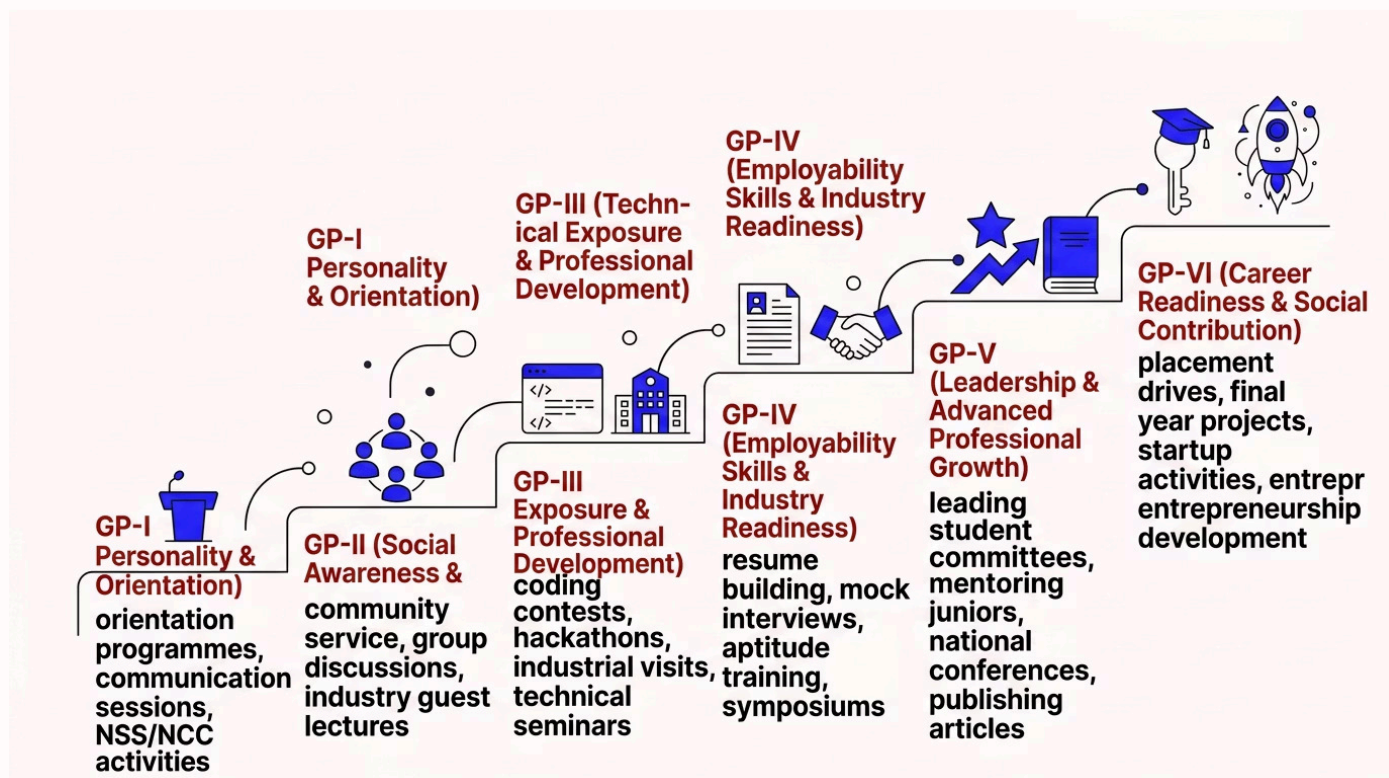

Applies knowledge and skills acquired throughout the programme to address a significant real-world problem. Develops research aptitude, critical thinking, innovation, and professional competencies. Involves problem identification, literature review, methodology development, analysis, implementation, testing, and documentation. May be carried out in collaboration with industry, research organisations, government agencies, or community stakeholders. Culminates in a project report, presentation, demonstration, and viva-voce — serving as a capstone experience reflecting NEP 2020 graduate attributes.

Research Project / Dissertation (Min. 12 Credits — Honours with Research)

Students choosing a 4-Year Bachelor's degree (Honours with Research) must take up a research project under faculty guidance, to be completed in the **eighth semester**. Research outcomes may be published in peer-reviewed journals, presented at conferences/seminars, or patented. Eligibility: CGPA \geq 7.5 after the 6th semester. Honours students not undertaking research will complete 3 courses for 12 credits in lieu of the dissertation.

General Proficiency — Semester-wise Development

General Proficiency is a co-curricular component that tracks the holistic development of students across all six semesters, from orientation and personality building to career readiness and community contribution.

Stage	Focus Area	Key Objective
GP-I	Personality & Orientation	Build confidence and communication skills at entry level
GP-II	Social Awareness	Improve teamwork, social responsibility, and leadership basics
GP-III	Technical Exposure	Enhance technical confidence and presentation skills
GP-IV	Employability Skills	Develop employability skills and professional grooming
GP-V	Leadership & Mentorship	Develop leadership, mentoring ability, and professional maturity
GP-VI	Career Readiness	Ensure career readiness, ethical responsibility, and community contribution

Modular Teaching & Evaluation Pattern

The NEP 2020 framework introduces a modular, continuous evaluation system that balances internal assessments, practical work, and end-term examinations to provide a comprehensive and fair assessment of student learning.

Internal Assessment Breakdown (60 Marks)

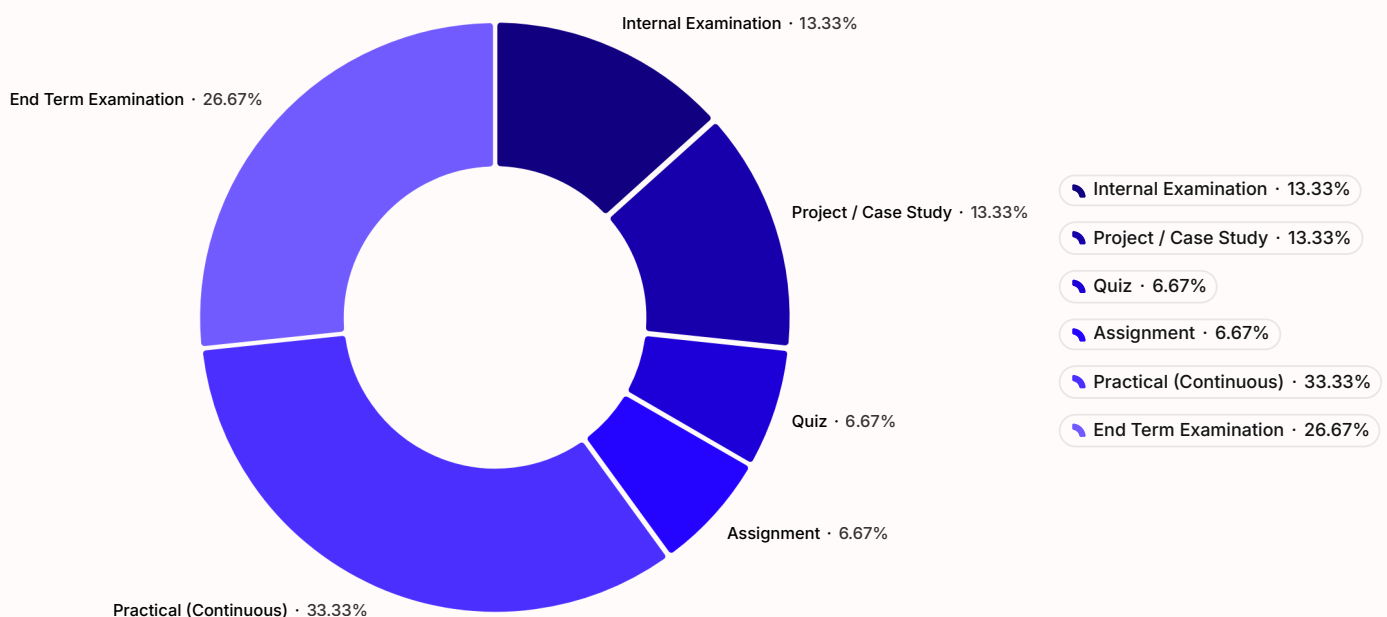

Component	Marks
One Internal Examination	20 Marks
Project / Case Study (2 × 10 Marks)	20 Marks
Quiz (1 Number)	10 Marks
Assignment (1 Number)	10 Marks
Total Internal	60 Marks

External Assessment

Component	Marks
Practical (Continuous Evaluation)	50 Marks
Final Examination (End Term)	40 Marks

Key Highlights of the Evaluation System

- Continuous and comprehensive assessment throughout the semester
- Project and case study-based evaluation promotes applied learning
- Quizzes and assignments ensure regular engagement with course content
- Practical evaluation rewards hands-on skills and lab performance
- End-term examination tests conceptual depth and analytical ability
- VIII Semester core major may be seminar-based with student presentations and discussions

The modular evaluation pattern ensures that students are assessed continuously and holistically, reducing dependence on a single high-stakes examination and encouraging consistent academic engagement throughout the programme.
